Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 are, drawn to an apparatus, classified in class 452, subclass 167.
- II. Claims 7-10 are, drawn to an apparatus, classified in class 452, subclass 167.
- III. Claims 11-15 are, drawn to an apparatus, classified in class 452, subclass 167.
- IV. Claims 16-20 are, drawn to an apparatus, classified in class 452, subclass 167.
- V. Claims 21-26 are, drawn to an apparatus, classified in class 452, subclass 167.
- VI. Claim 27 is, drawn to an apparatus, classified in class 452, subclass 167.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV, V and VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I-VI have separate utility such as splitting cattle. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mark Stallion on 06-13-2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas Price whose telephone number is 571-272-6892. The examiner can normally be reached on M-F from 6:30a.m. to 3:00p.m..
